WORK EXPERIENCE

ELPA President
European Liver Patient Association [2018 – Current]

Address: (Slovenia)

Stabilizing the environment after the elections in 2018 and implementation of new working processes. Added seven new members organizations (from UK, Croatia, Slovakia, Russia, Ireland, and Georgia) to the association and that resulted in an increase of reputation, members, and activities and has now 31 members from 25 countries. Secured the funding connections to all major supporters of the association. Establish a new communication strategy, based more on social media activities, where ELPA has become an influencer with communication to all major stakeholders. The process is the development of a new strategy for the period 2020 to 2023. After the elections, we re-arranged the ELPA Scientific Committee that is now made of five doctors from five countries. We secured the position of ELPA as an advisory organization to the European Medicine Agency and we managed to get ELPA into the Patient and Consumer Working Party (PCWP) at the European Medicine Agency. Besides the management of all internal and external processes of association, we kept the work of involvement of patient association into medical research projects. We managed the communication and dissemination part of EC Horizon 2020 projects that we are involved in and one EIT Health project.

In 2021 we got ISO certificate 9001:2015 for quality management system in the organization and become the first and only liver patient association with this certificate in Europe.

CEO and President

Association Slovenia HEP [03/2015 – Current]

City: Maribor

Country: Slovenia

I organize and lead the activities of patient association in Slovenia. We organize several events during the year, collaborate with medical experts, collaborate in media events and do yearly projects for testing, screening and data collection. In 2016 we received an award at EASL conference in Paris for project with most innovative approach to screening and testing for PWIDs and homeless people infected with hepatitis.

In 2015 I was guest in TV show on national TV (Ugriznimo znanost) where I improved one of the national memory records (I remembered 210 binary digits): <http://4d.rtv slo.si/arhiv/ugriznimo-znanost/174318219>.

In 2016 I was guest in an interview in TV show Good Evening (Dober večer) on Maribor TV where I talked about my work (<http://4d.rtv slo.si/arhiv/dober-vecer/174385725>).

MEMORY CHAMPIONSHIPS

Memory championships

I started to compete in memory championships right after my hepatitis C treatment. My first Slovenian national memory championship was in 2010 and then in 2011, 2012, 2013, 2014 and 2015. My best results were vice-champion in 2013 and 2014 and I have set up four national records: memorising words, cards, binary numbers and abstract pictures. Today (2017) only one record remains – memorizing the playing cards and in this category I am at place 220 at world memory championship list. From 2014 I teach memory techniques to students from nine faculties at University for Leadership Alma Mater Europaea in Maribor.

Redefining fatty liver disease: an international patient perspective

[05/10/2020]

Publisher: The Lancet Gastroenterology & hepatology

Despite its increased recognition as a major health threat, fatty liver disease associated with metabolic dysfunction remains largely underdiagnosed and undertreated. An international consensus panel has called for the disease to be renamed from non-alcoholic fatty liver disease (NAFLD) to metabolic-associated fatty liver disease (MAFLD) and has suggested how the disease should be diagnosed. This Viewpoint explores the call from the perspective of patient advocacy groups. Patients are well aware of the negative consequences of the NAFLD acronym. This advocacy group enthusiastically endorses the call to reframe the disease, which we believe will ultimately have a positive effect on patient care and quality of life and, through this effect, will reduce the burden on healthcare systems.
