

ESCAIDE 2014: Plenary session D : *Primum non nocere* - Why engineer microbes to be more dangerous to humankind:

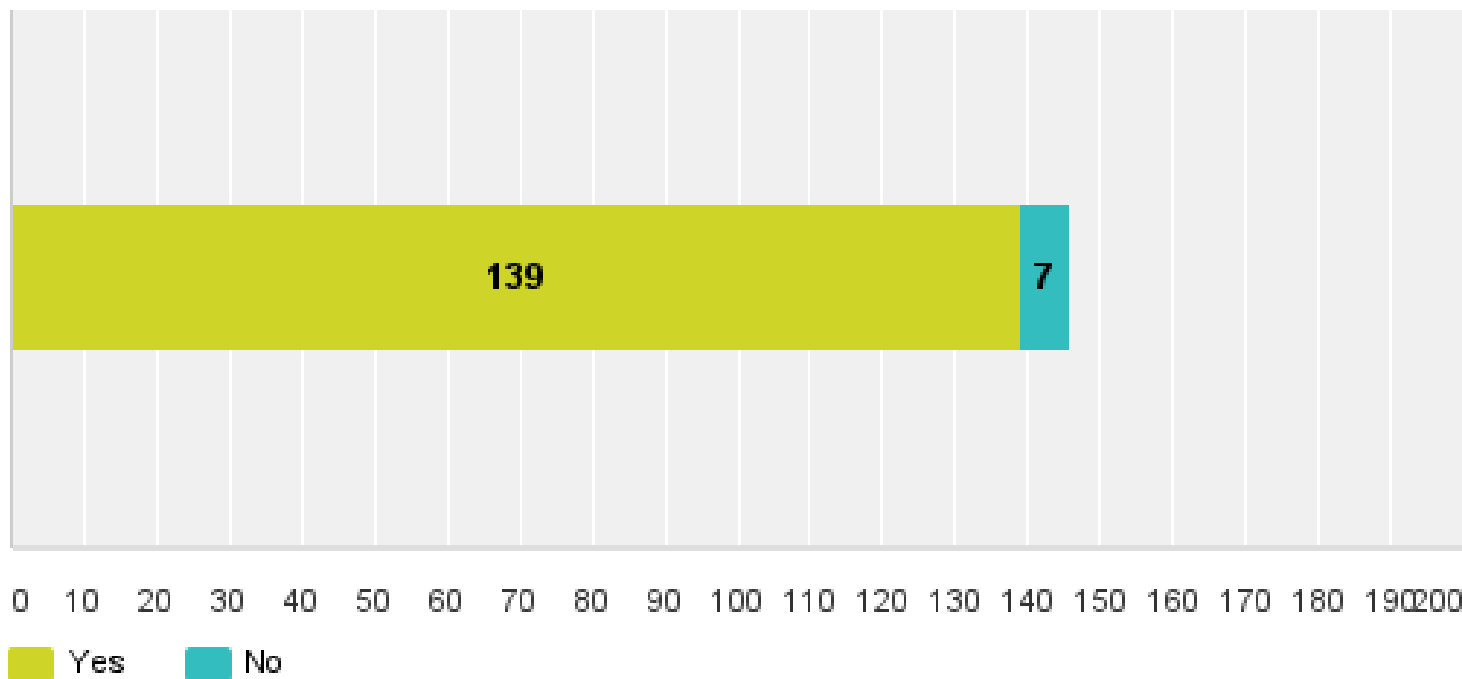

Audience Survey

Q1: Should 'Gain of Function' (GOF) research be paused in the EU until clearer policies are in place for researchers?

Q2: Should the public health sector be more involved in the risk-benefit analysis of GOF research?

Q3: Should the EU have a "dedicated body" to manage biosafety and biosecurity issues around dual-use "research of concern"?
