

REBECCA MOORE

WORK EXPERIENCE

August 2014 - present

Senior Researcher

European Institute of Women's Health,
<http://eurohealth.ie>

The European Institute of Women's Health (EIWH) is a Brussels based NGO which advocates an evidence based approach to the effect of sex and gender in health and healthcare issues. We disseminate research through advocacy at high level policy makers at European, national and regional level as well as directly to patients and through publications and social media. I am involved in various projects funded by the European Commission. These include ASSET, GO NANO, JA-CHRODIS, I also represent the EIWH at the EMA, EUnetHTA, BBMRI-ERIC and as an expert advisor for the European Institute for Gender Equality in their setting up of the Health Equality index. I have also done research for the WHO on behalf of the EIWH.

March 2016-Present

Health Economist at the National Cancer Control Programme Ireland

Working with the he National Cancer Control Programme in developing National Clinical Guidelines on oesophageal and colorectal cancer treatment. As a writing member of the team I'm providing the health economic evidence for the guidelines through identifying and quality assessing and rating peer-reviewed literature for inclusion in the economic part of the National Clinical Guidelines which I'm authoring.

(April 2012 - Aug 2014)

Center for Health Policy and Management, Department of Public Health, School of Medicine Trinity College Dublin

Part time job with the department where I'm doing my PhD, included working on research projects when needed, completed a technical report for the Irish Department of Health on comparing the cost of private or public provision of Radiation therapy in Ireland

Jan 2005-Sep 2006
 And
 Jan 2008-June 2008

Irish Examiner

Worked for a busy Irish National Daly Newspaper

EDUCATION AND TRAINING

September 2008 – Present

PhD Fellow in Health Economics (Part-time)

Trinity School of Medicine, Centre for Health Policy and management, Trinity College Dublin

A PhD under the All-Ireland Cancer Consortium: The first three years entailed classes in health economics, health policy, epidemiology, implementation science and research training in Ireland at TCD, UCC and RCSI and at The University of North Carolina. At UNC I was involved in comparative effectiveness projects commissioned by AHRQ. In addition I completed the Cancer Control and Prevention Programme in Bethesda, MD and Cost-effectiveness education at York University.

PHD title: Cost-Effectiveness of diagnostics in oesophageal cancer treatment. The thesis consists of three papers, one on the cost-effectiveness of PET/CT in Ireland when treating oesophageal cancer. The second paper assessed the cost-effectiveness of restating the cancer after neoadjuvant chemotherapy. The thesis also models the various ways of paying for the cyclotrons and the radio-pharmaceuticals. The final paper examines stage migration and PET/CT in patients with oesophageal cancer. It also looks at the effect PET/CT had on patient selection and treatment pathways.

September 2006 – September 2007

MSc Health, Population and Society (Merit)**London School of Economics and Political Science**

Dissertation Project: Cannabis, Mental Illness and Public Health.
